Online Wedding Album **New!!**

Create you own wedding album on Kiss the Bride to share with family and friends!

Instead of reinventing the wheel, Kiss the Bride combines the YouTube and Flickr technologies to create your own **FREE** Kiss the Bride online album. Both YouTube and Flickr are free and are backed by Google and Yahoo. They have excellent help files and are easy to use. Combining these technologies made sense. Kiss the Bride links it altogether for you in one central location. Family and friends can view ALL your media. What makes it even better is that family and friends can post their comments directly into your own kiss the Bride profile !

Wedding Insurance

Whilst weddings are joyous celebrations, they are also extremely expensive. Most of us dive into the wedding plans without a second thought to the possibility of disaster striking on our wedding day. We have heard stories of grooms having heart attacks, deaths in families and brides/grooms changing their minds at the last minute. Whilst many of these unforeseen events often occur at no fault of your own, the sad reality is that the probability of cancelling a wedding at the last minute and being fully reimbursed is miniscule.

Today, more people are opting to plan their wedding the safe way by investing in wedding insurance. Like other insurance, wedding insurance allows you to continue your wedding plan with the peace of mind that you are protected should an unforeseen event occur.

[Mojomo Insurance Brokers Pty Ltd](#) offers twenty years experience in the insurance industry. Mojomo Insurance Brokers provides immeasurable knowledge and experience whilst providing you with a policy to suit your requirements and budget.
